PROFESSIONAL SUMMARY

Reliable full stack software engineer with interest in product development that successfully handles fast-paced coding work. Proven willingness to take on any task to support the team and help business succeed. Offers strong react, react native, node, and express abilities for delivering web products.

SKILLS

JavaScript, React.js, Redux, React Native, Vanilla JavaScript, jQuery, JSON, APIs, Ruby, Ruby on Rails, Python 3.7, HTML5, CSS3, SASS, Bootstrap, Styled-Components, Materialize, Material-UI, Trello, Heroku, Netlify, Google Firebase, PostgreSQL, Postman, Express, Node.js, MongoDB, Mongoose, Git, GitHub, Microsoft Office (Word, Excel, PowerPoint, etc.)

SOFTWARE ENGINEERING PROJECT EXPERIENCE

Front End Developer - Crown Clothing

February 2021 – Current

- Developed a fully functional E-commerce website utilizing React.JS
- Integrated Google firebase for user authentication/database storage and Stripe API for processing payments.
- Diagnosed and corrected errors in software code during development.
- Integrated context for state management, then updated to redux
- Refined skill in React by rewriting class-based components to functional components

Full Stack Developer - Shouts!

January 2021 - January 2021

- Developed a full-stack social media website using React.JS, Node.JS, and Express.JS.
- Integrated Google Firebase for user authentication, cloud database storage, and hosting.
- Leveraged MaterialUI for styling utilizing modern software development design guidelines and supporting the user experience.

Lead Front End Developer - Couch-Critic

January 2021 - January 2021

- Created a full stack web application using React.JS, Ruby on Rails & PostgreSQL in a one week sprint.
- Refined and finalized designs by closely collaborating with fellow engineers on code implementation, validation, and debugging.
- Led peer-to-peer code reviews, project planning, and timeline estimations for development through Zoom and Slack.
- Taught peers the process of finding and correcting errors in code.
- Participated in 100% of phases of software development lifecycle with sound technical knowledge and project management abilities.

Backend Developer - Veronica's Lab Finder

October 2020 - October 2020

- Designed and developed software applications using Node.JS, Express.JS programming languages and MongoDB as a cloud database.
- Authored 100% of software development lifecycle with sound technical knowledge and project management abilities.
- Diagnosed and corrected errors in software code during development and after deployment.

ADDITIONAL EXPERIENCE

Concrete Mixer Driver - Alamo Concrete Products

August 2015 – Mar 2022

- Completed accurate work tasks by carefully reviewing every order.
- Managed continuous demands in a fast-paced environment by quickly picking up and delivering loads, this accounted for approximately 80% of every day.
- Managed 6+ deliveries per shift with 100% on-time rating.

EDUCATION

React mastery - Zero to Mastery Academy

March 2021

- Specialized training in React.JS & React Native

General Assembly - Software Engineering Immersive Certificate

January 2021

- Specialized training in React.JS, Node.JS, Express.JS, Ruby, Ruby on rails, MongoDB, PostgreSQL
